

APPENDIX 2c

Entity Relationship concordance for Core Concepts in the Software Design Minimal Methods

Action (Variable). [n015]; StateVector has . . .
Action is_a FunctionName. [n16]
After. [n166]; IntervalConstraint may_be . . .
Allocation has FunctionalMappings (List). [n125]
Allocation is_a Method. [n124]
Articulation has DataDictionary (List). [n081]
Articulation has Situation. [n079]
Articulation is_a Method. [n078]
Assignment. ; Function has atleast one . . .
Before. [n165]; IntervalConstraint may_be . . .
Bubble has ControlArc (Relation). [n060]
Bubble has ControlSpec (Holder). [n061]
Bubble has InputDataArcs (Parameters). [n065]
Bubble has Mode. [n058]
Bubble has OutputDataArcs (Parameters). [n066]
Bubble is Triggered. [n067]; When InputDataArcs present . . .
Bubbles (Function). [n054]; Context has . . .
Bubbles (List). [n057]; Bubbles decompose_into . . .
Bubbles decompose_into Bubbles (List). [n057]
Bubbles. [n062]; DataArcs maps_to . . .
Bunch has Intervals (List). [n176]
Bundle has Signals (List). [n173]
Bundles (Holder). [n161]; Sheaf has . . .
Color (Type). [n041]; Markers has . . .
CommunicationChannel has CommunicationMechanism. [n104]
CommunicationChannel has DataArcs. [n111]
CommunicationChannel has Protocol. [n110]
CommunicationChannel. [n119]; Task receives . . .; Message from . . . CommunicationChannel
CommunicationMechanism may_be Flag. [n108]
CommunicationMechanism may_be Queue. [n105]
CommunicationMechanism may_be Rendezvous. [n106]
CommunicationMechanism may_be Semaphore. [n107]
CommunicationMechanism may_be Variable. [n109]
CommunicationMechanism. [n104]; CommunicationChannel has . . .
CommunicationsChannels (List). [n094]; DARTS has . . .
ConcurrentDesign has ProcessingElements. [n097]
ConcurrentDesign. [n094]; DARTS has . . .
Context (Bubble). [n053]; Decomposition has . . .

Context has Bubbles (Function). [n054]
ControlArc (Relation). [n060]; Bubble has . . .
ControlSpec (Holder). [n061]; Bubble has . . .
ControlSpec establishes Mode. [n072]
ControlSpec may_have DecisionTable. [n069]
ControlSpec may_have PetriNet. [n071]
ControlSpec may_have ProcessActivationTable. [n070]
ControlSpec may_have StateMachine. [n068]
CurrentState (Variable). [n006]; StateMachine has . . .
CurrentState maps_to NowCurrentState. [n019]
CurrentState. [n018]; NextState maps_to . . .
DARTS has CommunicationsChannels (List). [n094]
DARTS has ConcurrentDesign. [n094]
DARTS has DistributedDesign. [n093]
DARTS has Monitors. [n116]
DARTS is_a method. [n092]
DataArcs (Relation). [n055]; Decomposition has . . .
DataArcs maps_to Bubbles. [n062]
DataArcs maps_to DataStore. [n063]
DataArcs maps_to Externals. [n064]
DataArcs. [n111]; CommunicaitonChannel has . . .
DataDictionary (List). [n081]; Articulation has . . .
DataDictionary has Entity. [n082]
DataDictionary has RelationArc (Relation). [n083]
DataItem (Variable). [n059]; DataItems has . . .
DataItems (List). [n088]; DataStores has . . .
DataItems has DataItem (Variable). [n059]
DataItems has DataTypes (Type). [n090]
DataItems. [n089]; Operations modify . . .
DataItems. [n113]; Message has . . .
DataStore (Holder). [n056]; Decomposition has . . .
DataStore (Holder). [n086]; Entity has . . .
DataStore. [n063]; DataArcs maps_to . . .
DataStore. [n117]; Monitor has . . .
DataStores has DataItems (List). [n088]
DataTypes (Type). [n090]; DataItems has . . .
Datum maps_to Variables. [n157]
Datum. [n152]; InformationFlow has . . .

DecisionTable. [n069]; ControlSpec may_have . . .
Decomposition has Context (Bubble). [n053]
Decomposition has DataArcs (Relation). [n055]
Decomposition has DataStore (Holder). [n056]
Decomposition has Externals (source or sink). [n052]
Decomposition has Mode (Type). [n051]
Decomposition is_a Method. [n050]
DesignElement Actions. [n147]; System Actions maps_to. . .
DesignElement Actions maps_to System States. [n148]
DesignElement States. [n149]; System Actions maps_to . . .
DesignElement.States. [n146]; System.States maps_to . . .
DesignElementFlow has DesignElements. [n141]
DesignElementFlow has System. [n142]
DesignElementFlow is_a Method. [n140]
DesignElements. [n141]; DesignElementFlow has . . .
DesignElment has StateMachine. [n145]
DiachronicMapping. [n154]; InformationFlow has . . .
DistributedDesign has ProcessingElements. [n096]
DistributedDesign. [n093]; DARTS has . . .
Dual (Variable). [n004]; Method may_have . . .
Duration (Variable). [n177]; Interval has . . .
During. [n167]; IntervalConstraint may_be . . .
Entities (List). [n085]; Entity decomposes_into . . .
Entities from Entities. [n084]; RelationArcs map_to . . .
Entities with RelationArcs. [n080]; Situation has . . .
Entity decomposes_into Entities (List). [n085]
Entity has DataStore (Holder). [n086]
Entity has Operations (Function). [n087]
Entity. [n082]; DataDictionary has . . .
Equals. [n172]; IntervalConstraint may_be . . .
Equation. [n075]; Function may_have . . .
Event (String). [n178]; Interval has . . .
Event (Variable). [n012]; StateVector has . . .
Event maps_to SMInput. [n020]
ExecutiveLoop. [n123]; Task has . . .
Externals (source or sink). [n052]; Decomposition has . . .
Externals. [n064]; DataArcs maps_to . . .
Finishes. [n169]; IntervalConstraint may_be . . .

FirePetriNet(null) is_a Operation. [n049]
Flag. [n108]; CommunicationMechanism may_be . . .
FromViewPoint (Variable). [n002]; Method has . . .
Function has atleast one Assignment.
Function maps_to ProcessingElements. [n121]
Function may_have Equation. [n075]
Function may_have Loop. [n073]
Function may_have Rule. [n076]
Function may_have Selector. [n074]
Function. [n120]; Task has . . .
Function. [n122]; Task has . . .; Selector of . . .
Function. [n135]; Instruction is_a . . .
FunctionName maps_to SMOutput. [n021]
FunctionName. ; Action is_a . . .
FunctionalArc (List of Relations). [n129]; FunctionalMapping has . . .
FunctionalArc maps_to ProcessingElement from Function. [n130]
FunctionalMapping depends_on SystemMode (Variable). [n126]
FunctionalMapping has FunctionalArc (List of Relations). [n129]
FunctionalMapping has Functions (List). [n127]
FunctionalMapping has ProcessingElements (List). [n128]
FunctionalMappings (List). [n125]; Allocation has . . .
Functions (List). [n127]; FunctionalMapping has . . .
GetAction(IN.SMInput->.Event;.OUT.SMOutput->.Action) is_a Operation. [n027]
GetCurrentState(OUT CurrentState) is_a Operation. [n024]
In Diachronic mapping the datum over time moves through a set of variables. [n156]
In Synchronic mapping the values in a set of variables relate to a single timespan. [n155]
InformationFlow has Datum. [n152]
InformationFlow has DiachronicMapping. [n154]
InformationFlow has SynchronicMapping. [n153]
InformationFlow has Variables. [n151]
InformationFlow is_a Method. [n150]
InputDataArcs (Parameters). [n065]; Bubble has . . .
InputPlaces (List). [n043]; Transit has . . .
Instruction is_a Function. [n135]
Instructions. [n133]; VirtualMachine has . . .
Interval (List). [n174]; Signal has . . .
Interval decomposes_into Intervals (List). [n180]
Interval has Duration (Variable). [n177]

Interval has Event (String). [n178]
Interval has State (String). [n179]
IntervalConstraint may_be After. [n166]
IntervalConstraint may_be Before. [n165]
IntervalConstraint may_be During. [n167]
IntervalConstraint may_be Equals. [n172]
IntervalConstraint may_be Finishes. [n169]
IntervalConstraint may_be Meets. [n171]
IntervalConstraint may_be Overlapping. [n170]
IntervalConstraint may_be Starts. [n168]
IntervalConstraints. [n164]; SignalArc has . . .
Intervals (List). [n176]; Bunch has . . .
Intervals (List). [n180]; Interval decomposes_into . . .
Lacune (List). [n175]; Signal has . . .
LeftHandSide has Marker Colors in InputPlaces. [n046]
LeftHandSide. [n044]; PetriRule has . . .
Loop. [n073]; Function may_have . . .
Marker Colors in InputPlaces. [n046]; LeftHandSide has . . .
Markers (List). [n033]; Petrinet has . . .
Markers has Color (Type). [n041]
Markers is_a Tokens (Type). [n037]
Markers propagate_along PetriArcs. [n040]
Meets. [n171]; IntervalConstraint may_be . . .
Message from CommunicationChannel. [n119]; Task receives . . .
Message has DataItems. [n113]
Messages. [n112]; Protocol has . . .
Messages.(List) associated_with_one ProcessingElement. [n137]; Worldline has . . .
Messages.(List) between ProcessingElements. zn39] ; Scenario has_causally_related . . .
Method has FromViewPoint (Variable). [n002]
Method has Name (Variable). [n001]
Method has ToViewPoint (Variable). [n003]
Method may_have Dual (Variable). [n004]
Method. [n092]; DARTS is_a . . .
Method. [n005]; StateMachine is_a . . .
Method. [n028]; Petrinet is_a . . .
Method. [n050]; Decomposition is_a . . .
Method. [n078]; Articulation is_a . . .
Method. [n124]; Allocation is_a . . .

Method. [n131]; VirtualMachine is_a . . .

Method. [n136]; WorldLine is_a . . .

Method. [n138]; Scenario is_a . . .

Method. [n140]; DesignElementFlow is_a . . .

Method. [n150]; InformationFlow is_a . . .

Method. [n159]; Temporality is_a . . .

Mode (Type). [n051]; Decomposition has . . .

Mode (Variable). [n008]; StateMachine has . . .

Mode maps_to StateVectors. [n022]

Mode. [n058]; Bubble has . . .

Mode. [n072]; ControlSpec establishes . . .

Monitor has DataStore. [n117]

Monitor has Semaphore. [n118]

Monitors. [n116]; DARTS has . . .

Name (Variable). [n001]; Method has . . .

NextState (Variable). [n014]; StateVector has . . .

NextState maps_to CurrentState. [n018]

NowCurrentState (Variable). [n013]; StateVector has . . .

NowCurrentState. [n019]; CurrentState maps_to . . .

Operation. [n024]; GetCurrentState(OUT CurrentState) is_a . . .

Operation. [n025]; SetInitialState(IN.CurrentState) is_a . . .

Operation. [n026]; SetInitialVectorList(IN.StateVectors) is_a . . .

Operation. [n027]; GetAction(IN.SMInput->.Event;.OUT.SMOutput->.Action) is_a . . .

Operation. [n049]; FirePetriNet(null) is_a . . .

Operations (Function List). [n023]; StateMachine has . . .

Operations (Function). [n087]; Entity has . . .

Operations (List). [n048]; Petrinet has . . .

Operations modify DataItems. [n089]

OutputDataArcs (Parameters). [n066]; Bubble has . . .

Overlapping. [n170]; IntervalConstraint may_be . . .

PetriArc (Relation) from Place to Transit. [n036]; PetriArcs has . . .

PetriArcs (List). [n032]; PetriMatrix has . . .

PetriArcs has PetriArc (Relation) from Place to Transit. [n036]

PetriArcs maps_to Places. [n038]

PetriArcs maps_to Transits. [n039]

PetriArcs. [n040]; Markers propagate_along . . .

PetriMatrix has PetriArcs (List). [n032]

PetriMatrix has Places (List). [n030]

PetriMatrix has Transits (List). [n031]
PetriMatrix. [n029]; Petrinet has . . .
PetriNet. [n071]; ControlSpec may_have . . .
PetriRule has LeftHandSide. [n044]
PetriRule has RightHandSide. [n045]
PetriRules (List). [n042]; Transit has . . .
Petrinet has Markers (List). [n033]
Petrinet has Operations (List). [n048]
Petrinet has PetriMatrix. [n029]
Petrinet is_a Method. [n028]
Place (Variable). [n034]; Places has . . .
Places (List). [n030]; PetriMatrix has . . .
Places has Place (Variable). [n034]
Places. [n038]; PetriArcs maps_to . . .
ProcessActivationTable. [n070]; ControlSpec may_have . . .
ProcessingElement from Function. [n130]; FunctionalArc maps_to . . .
ProcessingElement. [n098]; ProcessorArrays is_a . . .
ProcessingElement. [n101]; Task is_a . . .
ProcessingElement. [n137]; Worldline has . . .; Messages.(List) associated_with_one . . .
ProcessingElements (List). [n128]; FunctionalMapping has . . .
ProcessingElements. [n096]; DistributedDesign has . . .
ProcessingElements. [n097]; ConcurrentDesign has . . .
ProcessingElements. [n121]; Function maps_to . . .
ProcessingElements. zn39 ; Scenario has_causally_related . . .; Messages.(List) between . . .
ProcessorArrays decompose_into ProcessorArrays. [n099]
ProcessorArrays has Processors. [n100]
ProcessorArrays is_a ProcessingElement. [n098]
ProcessorArrays. [n099]; ProcessorArrays decompose_into . . .
Processors has Tasks. [n102]
Processors. [n100]; ProcessorArrays has . . .
Protocol has Messages. [n112]
Protocol has Receiver StateMachine. [n115]
Protocol has Sender StateMachine. [n114]
Protocol. [n110]; CommunicationChannel has . . .
Queue. [n105]; CommunicationMechanism may_be . . .
Receiver StateMachine. [n115]; Protocol has . . .
RelationArc (Relation). [n083]; DataDictionary has . . .
RelationArc has RelationAttributes (Variable). [n091]

RelationArcs map_to Entities from Entities. [n084]
RelationArcs. [n080]; Situation has . . . ; Entities with . . .
RelationAttributes (Variable). [n091]; RelationArc has . . .
Rendezvous. [n106]; CommunicationMechanism may_be . . .
RightHandSide triggers Transit. [n047]
RightHandSide. [n045]; PetriRule has . . .
Rule. [n076]; Function may_have . . .
SMInput (Parameter). [n009]; StateMachine has . . .
SMInput. [n020]; Event maps_to . . .
SMOutput (Parameter). [n010]; StateMachine has . . .
SMOutput. [n021]; FunctionName maps_to . . .
Scenario has_causally_related Messages (List) between ProcessingElements.
Scenario is_a Method. [n138]
Selector of Function. [n122]; Task has . . .
Selector. [n074]; Function may_have . . .
Semaphore. [n107]; CommunicationMechanism may_be . . .
Semaphore. [n118]; Monitor has . . .
Sender StateMachine. [n114]; Protocol has . . .
SetInitialState(IN.CurrentState) is_a Operation. [n025]
SetInitialVectorList(IN.StateVectors) is_a Operation. [n026]
Sheaf (Holder). [n160]; Temporality has . . .
Sheaf has Bundles (Holder). [n161]
Sheaf has SignalArc (Relation). [n162]
Signal from Signal. [n163]; SignalArc maps_to . . .
Signal has Interval (List). [n174]
Signal has Lacune (List). [n175]
SignalArc (Relation). [n162]; Sheaf has . . .
SignalArc has IntervalConstraints. [n164]
SignalArc maps_to Signal from Signal. [n163]
Signals (List). [n173]; Bundle has . . .
Situation has Entities with RelationArcs. [n080]
Situation. [n079]; Articulation has . . .
Starts. [n168]; IntervalConstraint may_be . . .
State (String). [n179]; Interval has . . .
StateMachine has CurrentState (Variable). [n006]
StateMachine has Mode (Variable). [n008]
StateMachine has Operations (Function List). [n023]
StateMachine has SMInput (Parameter). [n009]

StateMachine has SMOOutput (Parameter). [n010]
StateMachine has StateVectors (List). [n007]
StateMachine is_a Method. [n005]
StateMachine. [n068]; ControlSpec may_have . . .
StateMachine. [n134]; VirtualMachine may_have . . .
StateMachine. [n144]; System has . . .
StateMachine. [n145]; DesignElement has . . .
StateVector has Action (Variable). [n015]
StateVector has Event (Variable). [n012]
StateVector has NextState (Variable). [n014]
StateVector has NowCurrentState (Variable). [n013]
StateVector has Variables (Set). [n011]
StateVector is_a Trigger for Function. [n017]
StateVectors (List). [n007]; StateMachine has . . .
StateVectors. [n022]; Mode maps_to . . .
SynchronicMapping. [n153]; InformationFlow has . . .
System Actions maps_to DesignElement Actions. [n147]
System Actions maps_to DesignElement States. [n149]
System has StateMachine. [n144]
System has System. [n143]
System. [n142]; DesignElementFlow has . . .
System. [n143]; System has . . .
System States. [n148]; DesignElement Actions maps_to . . .
System.States maps_to DesignElement.States. [n146]
SystemMode (Variable). [n126]; FunctionalMapping depends_on . . .
Task has ExecutiveLoop. [n123]
Task has Function. [n120]
Task has Selector of Function. [n122]
Task is_a ProcessingElement. [n101]
Task receives Message from CommunicationChannel. [n119]
Tasks decompose_into Tasks. [n103]
Tasks. [n102]; Processors has . . .
Tasks. [n103]; Tasks decompose_into . . .
Temporality has Sheaf (Holder). [n160]
Temporality is_a Method. [n159]
ToViewPoint (Variable). [n003]; Method has . . .
Tokens (Type). [n037]; Markers is_a . . .
Transit (Function). [n035]; Transits has . . .

Transit has InputPlaces (List). [n043]
Transit has PetriRules (List). [n042]
Transit. [n047]; RightHandSide triggers . . .
Transits (List). [n031]; PetriMatrix has . . .
Transits has Transit (Function). [n035]
Transits. [n039]; PetriArcs maps_to . . .
Trigger for Function. [n017]; StateVector is_a . . .
Variable. [n109]; CommunicationMechanism may_be . . .
Variables (Set). [n011]; StateVector has . . .
Variables maps_to Variables via Datum. [n158]
Variables via Datum. [n158]; Variables maps_to . . .
Variables. [n151]; InformationFlow has . . .
Variables. [n157]; Datum maps_to . . .
VirtualMachine decomposes_into VirtualMachines. [n132]
VirtualMachine has Instructions. [n133]
VirtualMachine is_a Method. [n131]
VirtualMachine may_have StateMachine. [n134]
VirtualMachines. [n132]; VirtualMachine decomposes_into . . .
When InputDataArcs present Bubble is Triggered. [n067]
WorldLine is_a Method. [n136]
Worldline has Messages (List) associated with one ProcessingElement. [n137]
